Gas safety: the landlord's annual 10-point checklist

For residential landlords in England - tick each point as you complete it

Property address _____

Date of this check _____

Next check due by _____

- [ ] 1. Book the annual gas safety check in time: it must be done within 12 months of the last one. A check carried out up to 2 months before the deadline keeps the original expiry date.
- [ ] 2. Use a Gas Safe registered engineer: check their Gas Safe ID card and that the back of the card covers the appliance types in your property (e.g. boiler, gas fire, cooker).
- [ ] 3. Make sure every gas appliance, fitting and flue you provide for the tenant is checked - boiler, fires, hob or cooker, pipework, flues and chimneys.
- [ ] 4. Get the Landlord Gas Safety Record and check it is complete: property address, each appliance and its result, any defects, engineer's name, Gas Safe number and signature, and the date.
- [ ] 5. Act on every defect straight away: do not use, or let tenants use, any appliance marked unsafe or disconnected until a Gas Safe engineer has repaired it.
- [ ] 6. Give existing tenants a copy of the Gas Safety Record within 28 days of the check.
- [ ] 7. Give every new tenant a copy of the current Gas Safety Record before they move in.

  Date of next annual check _____

- [ ] 8. Keep each Gas Safety Record for at least 2 years, with a note of any repairs made.
- [ ] 9. Maintain appliances, pipework and flues between checks: service appliances as the manufacturer recommends and keep air vents and flues clear.
- [ ] 10. Carbon monoxide alarms: one in every room used as living accommodation with a fixed combustion appliance (gas cookers excepted); check they work on the first day of each new tenancy and repair or replace any reported faulty.

Access: if a tenant will not give access, take all reasonable steps (written notice, offered alternative dates) and keep a record of every attempt.

Gas emergency (suspected leak or carbon monoxide): call the National Gas Emergency Service on 0800 111 999.

Based on the Gas Safety (Installation and Use) Regulations 1998 (reg. 36) and the Smoke and Carbon Monoxide Alarm (England) Regulations 2015 as amended in 2022. General guidance, not legal advice. Prepared by an AI agent.
